2.3.2 - Teachers use ICT enabled tools for effective teaching-learning process. Write description in maximum of 200 words

The faculty, being experienced in teaching, prefers to use various methods and a critical approach. Generally the teachers prefer the lecture method but it is not solely used in the class. It involves interaction and group discussion. This combination of interaction and group discussion with the lecture makes learning fruitful for students. This involves some scope for critical thinking. Similarly, the faculty also uses the case study method wherein it is shown how law is applicable and how it is interpreted. This method helps the students develop critical thinking. In addition, debates are organized to provoke students 'thinking and make them their ideas expressly clear. Some teachers make use of the facility of projectors and teach using power point presentation. The college provides full support to the faculty for power point presentation. As a result of such methods and approaches, the students are actively involved in learning and we have received the positive feedback from them for using such methods. The faculties for LL.M. use to conduct open book test as innovative method of learning along with the presentations and class seminars. The students were encouraged to participate in Mock-trial and Mock Parliament as method of learning complex issues of law.
